      INTRODUCTION

It's no joke when I say that this game along with Blackjack and Casino Poker would have been rated T by the ESRB due to simulated gambling in the game.

        GAMEPLAY

When the game starts, you will press either button 1 or 2 on the console or for the MESS emulator, number 1 or Button 5 (represents console 2). Below is a small dialog of what the buttons will do.

1 - Automatic stoppage of reels

2 - Manually stop the reels.

-You can play this games as much as you like have money in your purse. Once you choose the purse amount, you can choose the size of the bet for each spin.

-Also after spinning the reels, you can change the size of the bet. The size of the bet are between 5 to 50 cents.

-Automatic reels are for those who are playing solely on look. It's hard to win at least one game.

-Manual reels give a better ounce of luck because you have to PLUNGE DOWN in order to stop one of the three reels so you can time it better to win.

-If you get at least 1 cherry (looks like an apple) as the first one or two reels then you win outright though the payoff is small.

-Getting three of any others will give you a good payout.
